

Remote Surveillance

External Detector Activated

Responding to genuine alarm conditions to provide an immediate deterrent to intruders

Remote Video response is at the forefront of remote video surveillance, protecting people, premises & assets. Holding both BS8418 for monitoring of the detector activated CCTV systems and BS5979 for approval for Alarm Receiving, ensures a professional and approved approach to resolving remote security solutions

A team of dedicated & highly trained, licensed operators will respond to your detector activated alarms, around the clock.

Viewing the area of activation our operators ascertain the most appropriate action plan to manage the activity at the site. Utilising the images presented by the CCTV system, remotely interacting with audio systems and escalating issues to Police or other authorities, ensures the most appropriate level of support only involving staff, guard patrols or key holders, where absolutely necessary.

All alarm response plans are created to reflect each site's unique circumstances and are developed to combat known issues, with the opportunity to develop further response plans to adapt to evolving business needs.

Typical Applications

Car Dealership
Hire Companies
Education Centres
Logistics
Storage
Domestic
