

Remote tours

Tailored Camera Tours

Supporting & enhancing current static guard services

Remote Tours are designed to offer a level of support to either existing static guard services or as a credible alternative to guard replacement.

Guard tours can follow many different cycles or patterns: -

- Specific scheduled times
- Randomly generated tours
- Event driven from either alarms or venue social events
- Heightened threat management

Each of these offers a level of security that does not allow the identification of specific security patterns that are in place to minimise your business risk.

Typical Applications

All CCTV applications with Ethernet capabilities
